

June Sungjoo Kim

Undergraduate Researcher, Seoul National University

junesjukim@gmail.com | junesjukim.github.io | github.com/junesjukim | Google Scholar

Research interests: vision-language-action models, world action models, synthetic robot data, 3D vision.

Education

Seoul National University B.Eng. in Biosystems Engineering and Artificial Intelligence · GPA 4.00 / 4.3	Mar 2021 – Present
Daejeon Science High School for the Gifted Physics and Chemistry	Graduated Feb 2021

Research Experience

SNU Visual Computing Lab Undergraduate Research Intern, advised by Prof. Hanbyul Joo	2026 – Present
- Creating synthetic vision-language-action (VLA) training data from human demonstrations (ongoing). - Simulation-ready compositional 3D scene reconstruction from a single image (SimuScene). - Zero-shot long-horizon dexterous manipulation with multi-view 3D-grounded VLM reasoning (ZeroDex).	
SNU Robot Learning Lab Undergraduate Research Intern, advised by Prof. Songhwai Oh	Dec 2024 – 2025
- Replaced diffusion with flow matching in Diffuser; predicting denoised data raised Adroit Pen-cloned from 49.8 to 66.8. - Integrated one-step Mean Flow sampling into DTAMP for milestone-based replanning in long-horizon manipulation.	
SNU Biosystems Control & Precision Lab Undergraduate Researcher	Jun 2022 – Dec 2022
<i>Autonomous racing (AI team lead)</i>: built a 4,000-image detection dataset and a lane-change state machine for the race car. <i>Unmanned orchard robot</i>: developed on-device fruit and disease detection (YOLOv5n on Jetson Nano) integrated with LiDAR SLAM navigation. Grand Prize, RDA Agricultural Robot Competition.	

Publications

SimuScene: Simulation-Ready Compositional 3D Scene Reconstruction from a Single Image Inhee Lee*, Sangwon Baik*, Sungjoo Kim , Hyeonwoo Kim, Hyunsoo Cha, Hanbyul Joo <i>Preprint, 2026</i> arXiv Project Code	
ZeroDex: Zero-Shot Long-Horizon Dexterous Manipulation via Multi-View 3D-Grounded VLM Reasoning Jisoo Kim, Sangwon Baik, Taeksoo Kim, Sungjoo Kim , Junyoung Lee, Mingi Choi, Hanbyul Joo <i>Preprint, 2026</i> arXiv Project	* Equal contribution

Industry & Projects

2nd Company Engineer, MEDi (accessibility app for visually impaired shoppers)	2025
On-device Android pipeline fusing TFLite detection with MediaPipe hand tracking (0.76 mAP); led latency optimization.	

Honors & Awards

Dongwon Development Fund Scholarship	
SNU Academic Scholarship	
Grand Prize , Agricultural Robot Competition, Rural Development Administration	2022
Excellence Award (KRW 5M prototype funding), 3rd SNU × Hansot Food Service Startup Competition	

Leadership & Programs

SNUSV.NET (SNU Student Venture Network), 36th Vice President; designed a startup curriculum	Oct 2024 – Present
Google Explore CSR Program , mentee at SNU GSDS AIoT Lab; quantization, pruning, domain adaptation	Jun – Sep 2024
Google Machine Learning Bootcamp , participant	Jun – Sep 2024

Skills & Languages

Programming	Python, C/C++, PyTorch, TensorFlow / TFLite, ROS, Linux, Kotlin
Languages	Korean (native), English (fluent, TOEFL 111), Japanese (fluent)
